### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Cordeiro on 4/10/07.

The application has been amended as follows:

7. (currently amended) A network comprising:  
a plurality of network nodes ~~{as claimed in claim 6}, characterized in that~~ the network nodes are directly coupled to each other via at least one star node;  
the at least one star node includes a plurality of star interfaces that are assigned to at least one respective network node, with one star interface transferring data, in dependence on a pilot signal varying frequency, from the assigned respective network node to the other star interfaces or from another star interface to the assigned respective network node,  
pilot signal evaluation circuit generates a send control signal and activates the send control signal if a pilot signal has been sent by the assigned network node and no other star interface having a. higher priority has simultaneously sent a pilot signal from the network node assigned to this other star interface,  
a star interlace is provided for transferring data from the assigned network node to the other star interfaces only when the send control signal is activated,

each star interface includes a first and second switching amplifiers, the first switching amplifier in an activated state passes data from the assigned network node to the other star interfaces, and the second switching amplifier in an activated state passes data from the other star interfaces to the assigned network node, and in the event of receiving the active send control signal, the first switching amplifier is in an active state and the second switching amplifier is in a non-active state,

a decision circuit evaluates the send control signals of all the star interfaces, and with a simultaneous occurrence of various send control signals corresponding to the simultaneous arrival of at least two pilot signals at respective star interfaces, the decision circuit releases via a decision control signal a certain star interface for the transmission of data, and

the decision circuit includes a chain of in-line decision elements each having an OR gate ~~[, in]~~ that ~~[each OR gate]~~ combines the output signal of the previous decision element with a local send request signal generated by the pilot signal evaluation circuit and indicating the presence of the pilot signal, ~~[and in that]~~ the output signal of an OR gate ~~[is]~~ being the decision control signal for the star interface assigned to the next decision element in the chain.

8. (currently amended) A network as defined in claim 7, ~~characterized in that~~ wherein the decision circuit includes a decision decoder decoding the send control signals, and a 1-from-m decoder receiving the output signals of the decision decoder, which 1-from-m decoder generates a respective decision control signal for the respective star interfaces.

In the Specification page 1, in the line 2 of the Title, "mode" has been changed to "node".

Art Unit: 2616

In the Specification page 1, after title, "SUMMARY OF INVENTION" has been inserted.

In the Specification page 3, line 5, "BRIEF DESCRIPTION OF THE DRAWINGS" has been inserted.

In the Specification page 3, line 15, "DETAILED DESCRIPTION" has been inserted.

### **Reasons For Allowance**

2. The following is an examiner's statement of reasons for allowance: Prior Art fails to disclose of the decision circuit that includes a chain of in-line decision elements each having an OR gate that combines the output signal of the previous decision element with a local send request signal generated by the pilot signal evaluation circuit and indicating the presence of the pilot signal, the output signal of an OR gate being the decision control signal for the star interface assigned to the next decision element in the chain in combination with other limitations set forth in the respective claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2616
